

INTERNATIONAL  
CODE COUNCIL®

People Helping People  
Build a Safer World®

# THE QUALITY AND EXPERTISE YOU WANT THE STRENGTH AND SECURITY YOU NEED

The International Code Council is a member-focused association. It is dedicated to developing model codes and standards used in the design, build and compliance process to construct safe, sustainable, affordable and resilient structures. Most U.S. communities and many global markets choose the International Codes.

*Our mission is to provide the highest quality codes, standards, products and services for all concerned with the safety and performance of the built environment.*

## MEMBERSHIP

### MEMBERSHIP

At the heart of ICC's rich history is our mission to deliver top-notch education and professional development, innovative products and services, timely industry news and valuable networking opportunities, and to provide a tremendous public good – our model codes. The organization offers several membership categories and an extensive system of regional offices, chapters and key relationships with officials at the state and local levels of government.

Code enforcement and fire officials, designers, architects, construction professionals, corporate representatives and others involved in the development and maintenance of the built environment are all valued Members of the Code Council.

### MEMBER BENEFITS

As a Member of the Code Council, you can expect nothing less than world-class service. Compared to the enormous benefits of ICC membership, the yearly dues are a great value. Member benefits include:

- Free code book(s) – new Members receive a free book or set of books (depending on membership category).
- 10%–25% off code books, CDs, specialized publications, and training materials.
- World-class training and educational programs so you can learn while you earn CEUs and LUs.
- Professional certification to verify your knowledge through ICC's certification programs.
- Code opinions from experts to answer your code-related questions.

## PRODUCTS

The Code Council offers a comprehensive portfolio of quality products to meet the needs of a diverse audience and evolving industry. The variety of codes, standards and support documents assist design, construction and code enforcement professionals with the important duty of ensuring public safety.

### INTERNATIONAL CODES® (I-CODES®)

The International Code Family is the most comprehensive set of construction regulations available. The I-Codes are developed to integrate with each other to provide a uniform set of codes that yields positive impacts on building safety as well as cost and affordability.

### REGIONAL CODES

Currently, one or more of the I-Codes has been adopted or is in use in all 50 United States, the District of Columbia, Guam, Puerto Rico and the U.S. Virgin Islands. In the U.S., some states adopt a specific edition of the I-Codes, while others work with the Code Council to customize the codes for local use with amendments specific to the climatic, geographic and topographical conditions of the jurisdiction.

## THE INTERNATIONAL CODE FAMILY

**\*IBC®**  
International Building Code®

**\*IRC®**  
International Residential Code® for One- and Two-Family Dwellings

**\*IFC®**  
International Fire Code®

**\*IPC®**  
International Plumbing Code®

**\*IMC®**  
International Mechanical Code®

**\*IFGC®**  
International Fuel Gas Code®

**\*IECC®**  
International Energy Conservation Code®

**\*IWUIC®**  
International Wildland-Urban Interface Code®

**\*IEBC®**  
International Existing Building Code®

**\*IPMC®**  
International Property Maintenance Code®

**\*ICCP®**  
International Code Council Performance Code® for Buildings and Facilities

**\*IPSDC®**  
International Private Sewage Disposal Code®

**\*IZC®**  
International Zoning Code®

**\*ISPSC™**  
International Swimming Pool and Spa Code™

**\*IGCC™**  
International Green Construction Code™

For information about **PRODUCTS**:

### STANDARDS

The ICC Standards were developed utilizing a consensus process and are adopted by reference to be used with the I-Codes or as a standalone document by jurisdictions internationally. The Standards are approved by the American National Standards Institute and address such important topics as accessibility, bleachers and grandstands, log structures, storm shelters, residential dwellings in high-wind regions and green residential building.

### COMMENTARIES

Code application is clarified in the Commentary series to ensure thorough understanding of how to interpret and enforce the I-Codes. Each book reprints every code section in its entirety and follows it immediately with corresponding commentary written by ICC code experts.

### GUIDELINES

A recent addition to the Code Council's full array of technical publications, the Guideline series brings focused attention to areas such as replicable buildings, acoustics and toilets.

### DIGITAL FORMATS

The I-Codes and most support references are now available as immediate PDF downloads, CD-ROM or printed editions. The ICC Market iPad app (version 4.0) allows users to purchase and download select codes and reference in PDF and ePUB formats.

### EXAM PREPARATION

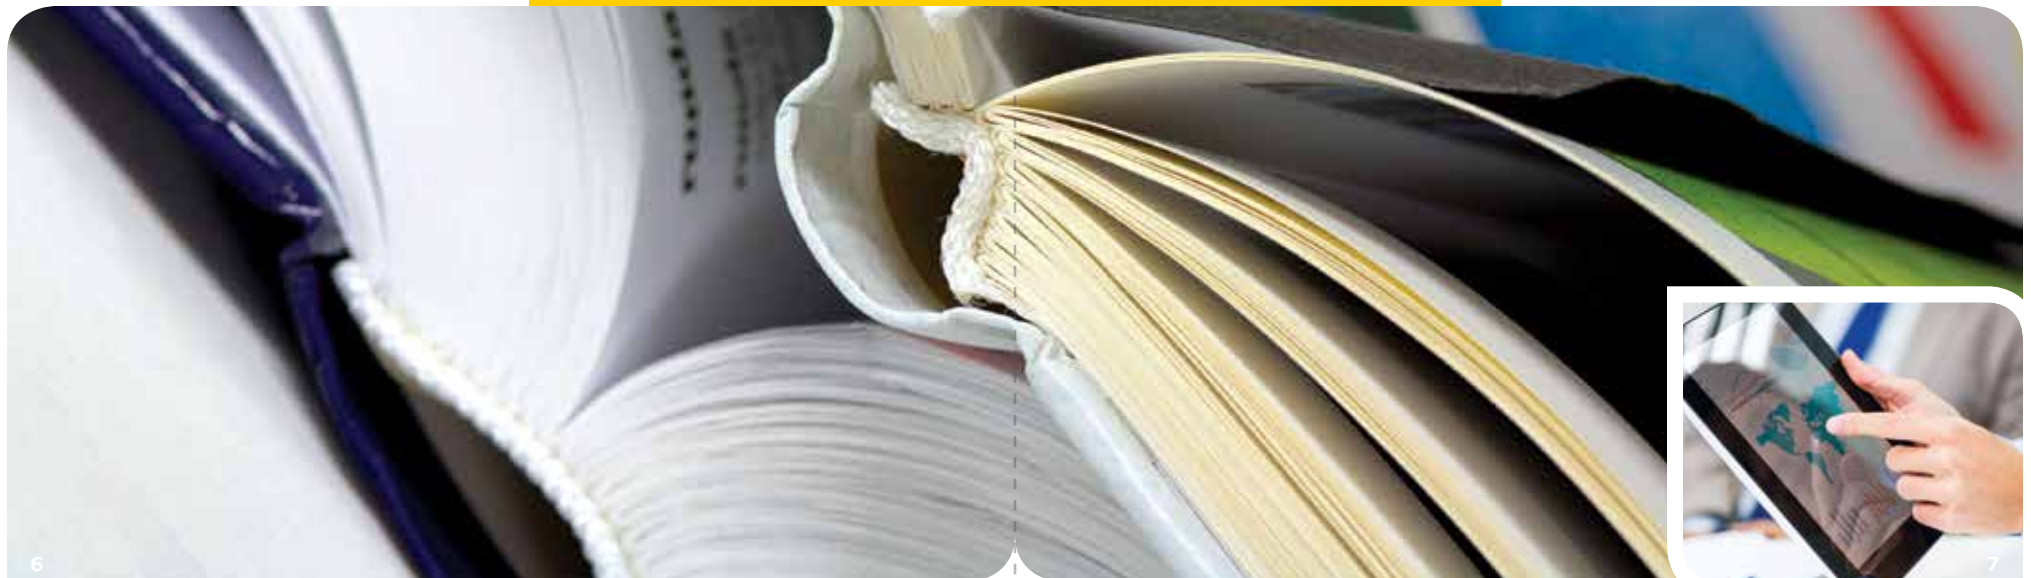

Two popular series, the Study Companions and Flash Cards, have been helping exam candidates with test preparation for years. Each Study Companion takes the reader step-by-step through critical points of the code using discussion and illustrations to assist in understanding the content, and each Companion includes practice quizzes. ICC also offers certification practice exams through its Campus Online portal: [www.icccampus.com](http://www.icccampus.com).

### PUBLISHING PARTNERS

The Code Council is pleased to work with notable publishing houses such as Cengage, McGraw-Hill, John Wiley & Sons and CRC Press. These partnerships have helped ICC to develop several best-selling series that ensure smooth transitions for code users moving from one edition of the code to the next.

### SUPPORT REFERENCES

The Code Council Product Development team is dedicated to meeting the everyday needs of all who interpret, apply and enforce the I-Codes. A complete system of support publications is available from in-depth textbooks to quick-reference guides, such as IBC Handbooks, Significant Changes Series, Turbo Tabs, Inspector's Guides and many more.

## TRAINING AND EDUCATION

ICC's professional training and education programs address your career development needs.

Industry professionals look to ICC to provide the critical skills and knowledge necessary to excel in today's challenging world. ICC's education programs cover a broad spectrum of code and construction-related topics.

Whether you want to build your professional skills, expand your knowledge base, stay on the leading edge of code development or prepare for your next certification exam, ICC's training and education programs are designed for maximum impact and results.

### INSTITUTES

ICC's training institutes offer a comprehensive education experience. Learn best practices from the leading experts in the field, meet colleagues and build a network of professional contacts, earn CEUs and share your experiences.

### WEBINARS

Stay on top of code-related updates through ICC's webinars. These online seminars introduce and explain various code topics and allow participants to engage with industry experts.

### HIRE TO TEACH

ICC's course catalog contains a variety of educational topics that are available for contract at a location of your choice. Customized training is also available to fit your needs.

### ICC CAMPUS ONLINE

Online courses offer access to a comprehensive training and education portal, providing you with an inexpensive and convenient tool to enhance your professional skills and earn CEU's.

## CERTIFICATION AND TESTING

The ICC is a world-class leader in providing professional certification for code inspection and administration personnel worldwide. ICC national certification exams provide individuals with an opportunity to get professional recognition and demonstrate their knowledge of various construction regulatory codes, standards and practices.

75,000 individuals hold current ICC certifications in one or more of 65 areas of expertise, including 700 Master Code Professionals (MCP), the highest designation recognized in the profession. Many building departments require ICC certification for employment and career advancement.

ICC also develops and administers customized construction trade licensing exams for hundreds of state and municipal jurisdictions.

An ICC Certification represents a significant accomplishment that offers invaluable benefits, including:

- Increased salary potential.
- Career advancement opportunities.
- Validation of technical expertise.
- Verification of commitment to protect public health, safety and welfare.
- Professional recognition of being certified by ICC—the premiere organization for building safety.

For information about **CERTIFICATION AND TESTING**:

Visit [iccsafe.org/certification](https://iccsafe.org/certification) or call 888-422-7233, x5524

## PLAN REVIEW SERVICES

From high-rise commercial structures and retail centers to educational and residential developments, ICC Plan Review Services delivers the most comprehensive, detailed plan reviews available.

No plan review is too complex for our code experts. That's why state and local government agencies, architects and building professionals depend on ICC for the most accurate code

analysis in the country. Every plan review is prepared by ICC-certified professional engineers and architects who have extensive knowledge of the ICC International and Legacy Model Codes, and know how best to apply them to your projects.

## WHAT WE OFFER

- Quality solutions to even your most complex plan review projects.
- Expert plan reviewers who work directly with you to meet your unique turnaround requirements while maintaining the highest standards of quality.
- Industry credibility that comes from ICC's direct involvement in the development process of the International Codes. Our role in the development process makes ICC "the source" to which other plan review firms refer to for credibility.

For information about **PLAN REVIEW SERVICES**:

Visit [iccsafe.org/techservices](http://iccsafe.org/techservices) or call 888-422-7233, x33809

ICC-ES is a subsidiary of the International Code Council and is accredited by the American National Standards Institute (ANSI) to the requirements of ISO/IEC Guide 65. With nearly a century of experience and close to 1,600 evaluation reports, ICC-ES is the industry leader in performing technical evaluations of building products and materials for code compliance. ICC-ES is the most widely accepted and trusted brand in the nation and internationally for building product evaluations.

**EVALUATION REPORTS (ESR)**

An ICC-ES Evaluation Report is a report on a specific building product, and represents an independent evaluation of how the product meets performance and prescriptive provisions in the International Codes® (I-Codes®), ensuring public safety while allowing innovation to thrive. When new or innovative products not adequately addressed by the code are submitted for evaluation, an Acceptance Criteria is developed, discussed and approved in open public hearings with the Evaluation Committee and interested parties. The ICC-ES ESRs are posted free of charge at [www.icc-es.org](http://www.icc-es.org).

**PLUMBING, MECHANICAL AND FUEL GAS LISTINGS LISTING PROGRAM (PMG)**

The ICC-ES PMG Listing Program is accredited by both ANSI and the Standards Council of Canada (SCC).

It certifies products in the areas of plumbing, mechanical and fuel gas. Furthermore, the PMG Listing Program is approved by the City of Los Angeles. An ICC-ES PMG Listing is a document issued on a product that has demonstrated compliance with applicable standards and has also demonstrated compliance with applicable international and uniform codes. ICC-ES PMG also offers listings to WaterSense® for specific water-efficient products and listings for solar thermal products. The ICC-ES PMG Listings are posted free of charge at [www.icc-es.org/pmg](http://www.icc-es.org/pmg).

**BUILDING PRODUCT LISTING PROGRAM (ESL)**

The ICC-ES Building Product Listing Program offers listings for manufacturers of building products to show their product compliance with applicable consensus standard(s) referenced in the I-Codes. Compared to an ICC-ES evaluation report (ESR), the program covers aspects of the product as outlined in the standard and specific related code sections, its installations and implications. The listing categories can be found at [www.icc-es.org/listing](http://www.icc-es.org/listing).

**ICC-ES VAR ENVIRONMENTAL PROGRAMS (EP)**

The ICC-ES Environmental Programs (formerly known as SAVE™) provide manufacturers with comprehensive evaluation and/or certification that their products meet specific sustainability targets. The ICC-ES Environmental Programs offer evaluations under the ICC-ES VAR Environmental Report Program and certifications under the Environmental Product Declaration Program. Learn more at: [www.icc-es.org/ep](http://www.icc-es.org/ep).

**EDUCATION AND RESOURCES**

ICC-ES is continuously adding new tools and educational resources to keep building professionals abreast of the latest technological developments as well as providing Continuing Education Units. All available tools are accessible free of charge at [www.icc-es.org/education](http://www.icc-es.org/education).

Visit [icc-es.org](http://icc-es.org) or call 800-423-6587, x42237

### VERIFY COMPETENCE

The International Accreditation Service (IAS), a subsidiary of the ICC, provides several accreditation programs that are used by regulators and industry to verify if programs or institutions meet established standards and are competent to carry out specific tasks.

Federal, state and local governmental agencies require accreditation to verify the technical competence of organizations like laboratories, inspection bodies and certification agencies. Building departments and fire prevention departments seek accreditation to demonstrate their competence, professional qualifications and ability to serve their jurisdictions.

IAS accreditation assesses an organization’s formal processes and procedures, staff, equipment and service goals. IAS issues a certificate of accreditation to entities that successfully complete the assessment process and demonstrate compliance with the applicable requirements.

All IAS accreditation certificates, which provide details on the accreditation status and scope of accreditation, are available to view at no cost at [www.iasonline.org](http://www.iasonline.org).

### ORGANIZATIONS ACCREDITED BY IAS

IAS uses a formal, independent and internationally recognized process to accredit the following:

- Testing and calibration laboratories
- Special inspection agencies
- Inspection agencies
- Inspection programs for metal building manufacturers
- Steel and concrete fabricator inspection programs
- Product certification agencies
- Training agencies and curriculum developers
- Field evaluation bodies
- Building departments
- Fire prevention departments
- Third-party building department service providers
- Personnel certification bodies

A pioneer in the accreditation profession, IAS actively develops new accreditation programs for organizations seeking to demonstrate the highest level of competence and service in their respective industries.

### TRAINING

IAS offers training in many quality-related areas that have proven to be of value to those interested in achieving and maintaining accreditation to international standards. Classroom and online training programs are custom designed for the target audience and utilize a combination of teaching techniques including real-world examples, student interaction and hands-on activities. Whether you’re interested in training a technician, your quality manager, engineers or your entire staff, we can design a program to fit your needs.

### ICC ALSO OFFERS GLOBAL SERVICES

Global Services provides technical and institutional assistance to the global community in the area of building safety. The Global Services team collaborates with other ICC departments by providing coordination and support to global economies interested in the adoption or adaptation of ICC codes, education and training programs, certification, code administration and enforcement. Global Services also coordinates with ICC subsidiaries, ICC Evaluation Service (ICC-ES) and the International Accreditation Service (IAS) on conformity assessment programs that are available to interested economies.

The ICC is committed to promoting safe building construction worldwide through practical application of regulation and enforcement mechanisms to increase the effectiveness of the building codes and their role in disaster risk reduction and use of sustainable natural resources.
