Welcome to the Building Safety Month Resource Center on the ICC website!

Building Safety Month is celebrated annually in May to help individuals, families, and businesses learn how to create and maintain safe, sustainable and resilient homes and buildings in the United States and around the globe. The initiative reinforces the need for the adoption of current safety codes, a strong and efficient system to ensure code compliance, and a well-trained professional workforce to provide public safety. Those three steps are what it takes to build stronger communities and ultimately a safer world.

One of the primary goals of Building Safety Month is to encourage collaboration and participation in this important public education initiative. On our website you will find:

- Free, downloadable tools, how-to guides and fun educational materials geared for children.
- Resources for ICC Members, the construction industry and the public outlining how to participate and sponsor Building Safety Month.

Please get involved and help us spread the word about how to save lives and protect property with this year's theme: *Building Codes: Driving Growth through Innovation, Resilience and Safety.*

Enjoy the wealth of information diligently put together for you and please share with your friends and colleagues. Thank you for your support of Building Safety Month.

Sincerely,

Alex Olszowy, III
ICC Board President

Dominic Sims
ICC CEO
