Certified Sustainability Professional Requirements

The Certified Sustainability Professional (CSP) is a designation that provides portability for professionals holding ICC and/or California certifications to show proficiency and interest in sustainability across the nation without having to obtain another license or designation.

The CSP designation will require a current AIA, PE, CBO, CFM, or MCP license or designation; one current energy conservation certification; and one current green building certification.

You will need to fulfill at least one requirement from each column below:

Certified Sustainability Professional Designation (CSP) Requirements		
Licensure	Energy Conservation	Green Building
AIA	77	GC
PE	78	G1
CBO	79	
CFM	CE	
MCP	CG, CX, or CT*	

◆ CG and CX are based on CALGreen, which includes both green building and energy content.

Ways to Obtain a CSP Designation:

There are two methods by which to obtain the designation, depending on whether an individual holds ICC and/or California certifications and specific licensures:

Method 1:

- 1 current AIA, PE, CBO, CFM, or MCP license or designation
- + 1 current Energy Conservation Certification
- + 1 current Green Building certification

Certified Sustainability Professional

Method 2:

- 1 current AIA, PE, CBO, CFM, or MCP license or designation
- + 1 current CALGreen Inspector certification (CG, CX, CT)

Certified Sustainability Professional
