GG205-14
505.2.3

Proponent: Michael Gardner, Gypsum Association, representing Gypsum Association (mgardner@gypsum.org)

Revise as follows:

505.2.3 Recyclable building materials and building components. Recyclable building materials and building components shall comply with one of the following:

1. Building materials or components that can be recycled into the same material or another material with a minimum recovery rate of not less than 30 percent through recycling and reprocessing or reuse, or
2. Building materials shall be recyclable through an established, nationally available closed loop manufacturer’s take-back program.

Reason: Because of the multiple changes effected to Section 505.2.2 during the previous cycle, the current text reads like a definition. Proposal simply re-casts text in a more appropriate format.

Cost Impact: Will not increase the cost of construction.
