Subject: IECC Discussion

To whom it may concern,

For practicing architects, it would be a tremendous burden to track changes if ICC were to change course moving away from the IECC. As of now, the building community has to deal with two standards: IECC and ASHRAE 90.1. If ICC were to develop additional energy efficiency considerations, those could be detrimental to the efficiency of the design and construction process.

Regards,

Doug Hammel, AIA, NCARB
Executive Vice President, Director of Hospitality/Residential Projects
