Subject: comment regarding IECC development process

Good afternoon,

I am writing to express the Village of Glencoe's support of the Metropolitan Mayors Caucus' concerns regarding the proposed changes to the development process for the IECC. We support continuing to allow local government officials to vote on updates. The proposed changes would limit local government officials' control over the substance of the codes that guide development within their borders. Local officials have in-depth knowledge of how codes are administered, and we support maintaining their involvement in the decision-making process.

Thank you,
