Subject: current process in developing codes

To whom it may Concern;

Municipal Code officials have always had the welfare of their communities in hand and was the efforts of the Officials that made the changes to the 2018 codes

We urge the ICC to continue the current process in developing the IECC code, which allows local government officials to vote on updates. Our local government officials are knowledgeable on how the code is administered, so it is crucial that they are involved in the decision-making process. Code officials vote with the public's interest in mind, rather than financial interests.

Respectfully,

Eric Shaw
Building Commissioner
Village of Richton Park
