Subject: Appeals to the Energy Code Vote

Dear International Code Council Leadership -

I wanted to drop an email to register my disapproval and concern with regard to the appeals that have been mounted against the duly decided vote by voting members to increase the efficiency requirements of relevant codes. This vote was taken in good faith, for the right reasons and according to the rules. Appeals from corporate interest groups that weaken the provisions voted by the membership to help sustain our environment in the face of the existential threat of climate change should be rejected out of hand.

Those who voted did so by the rules and for reasons aside from self interest. To roll back those votes or appeal on insufficient grounds as the filings demonstrate would be to invalidate the council's mission and duty. Please reject this ill founded resistance to the voting membership's franchise, the spirit and letter of fairness, and, of course, looming catastrophe that faces the world if we don't take action.

Sincerely,

CJ Volpone
Lincoln, MA
